SUMMARY

Self-taught Product Designer with a background in Computer Science. I design with technical constraints in mind which means my work is both intuitive for users and feasible for developers. Currently building UX case studies and seeking a Product Design internship.

EDUCATION

Bachelor of Technology - BTech, Computer science (data science)

Rungta College of Engineering & Technology

08/2023 – 05/2027

Kohka-Kurud Bhilai

Chhattisgarh Board of Secondary Education (CGBSE)

04/2011 – 03/2023

PROJECTS

Duolingo — Energy System Redesign 🔗

09/2026 – 09/2026

UX Research & Product Redesign

Identified a critical UX problem in Duolingo's energy system that limits motivated learners to 2 lessons daily. Conducted secondary research, built user persona, identified pain points, and designed a redesigned energy system that allows 5-8 lessons daily while maintaining Duolingo's business model.

Swiggy UX Audit 🔗

08/2026 – 08/2026

UX Research & Opportunity Mapping

Conducted a UX audit of Swiggy's home, profile, and location flows. Identified pain points using affinity mapping and problem framing. Documented opportunities for improving user experience across key app sections.
